Re: Underground Storage Tank (UST) Program Expedited Enforcement Compliance Order and Settlement Agreement (Field Citation) No. 00102 and Filed Notice of Non-Compliance (FNNC) No. 1375 from the March 1, 2007, UST facility inspection of Frank Coluccio Construction Inc. in Seattle, WA (EPA ID No. WA2676)

Dear Mr. Clouatre:

The information that I received from you on April 16, 2007, satisfies the violations cited in Field Citation No. 1375 and FNNC No. 1375 that was issued on March 1, 2007, for your facility. Thank you for submitting the necessary documentation needed to bring your facility into full compliance.

As a reminder, continue to maintain your UST insurance, perform monthly tank release detection testing, and keep your spill buckets clean and dry. You do not need to send in subsequent test results to us, but rather, they should be kept with your UST records and be available for review upon request by EPA or the Washington Department of Ecology (Ecology).

If you have any questions in reference to this inspection, please call me at (206) 553-6361. In the future, if you have any questions about the Ecology UST Program (e.g., inspections, permits, etc.), please contact Annette Ademasu, Ecology NW Regional Office, at 425-649-4426.

Sincerely,

Adam Baron
Environmental Protection Specialist
Underground Storage Tank Program
